DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 8, the phrase "can be operated" renders the claim indefinite because it is unclear whether the limitations following the phrase "can" are part of the claimed invention.

Claims 9-16 are rejected by virtue of their dependence.

Allowable Subject Matter

3. Claims 1-7 are allowed.
4. Claims 8-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: With respect to claims 1-16, prior art fails to teach or make obvious a method

comprising: a thawing mode in which the liquid metal is melted in a line of the liquid-metal anode; and an operating mode in which the liquid metal is pumped through the line and X-ray beams are produced, wherein in thawing mode, the engine of the pump is constantly switched on and off in turn as claimed in combination with all of the remaining limitation of the base claim and any intervening claim.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harding et al. (US Patent Application Publication 2003/0016789 A1 and US Patents 6,647,094 B2 and 6,925,151 B2) teaches the methods and apparatus comprising x-ray source with a liquid metal target.
